Re: Salmon River School District Duct Cleaning Project

To Whom It May Concern:

Both the Salmon River School District and my firm are very appreciative of the excellent job that Indoor Air Technologies recently performed on the project we specified for the school district. Your crew members and office staff proved that they are professionals in their field through their organization, communication skills, their excellent recommendations, and their courtesy.

Your staff was very thorough from the start of the project to the end. Their timeliness in performing their work during periods school was not in session avoided what could have been major disruptions.

We would highly recommend Indoor Air Technologies to anyone requiring these services, and enjoyed having you on our project.

Yours truly,
W-P-S Consulting Engineers, P. C.
